TS-Talent

techso.SOFT

TS-Talent allows you to manage your candidates and job offers while truly collaborating with your colleagues. As a 100% web-based solution, accessing the data has never been easier from any type of device. Multilingual, simple and intuitive, the TS-Talent features are available in French, English and other languages.

INCREASE your chances of finding the perfect candidate and be **REACTIVE !**

TS-Talent allows you to build a solid database of qualified candidates for your future jobs to fill. Rather than start over the whole process each time you're recruiting, you can pick the perfect fit into your database, or simply repost your job offer in just a few clicks! As a bonus, TS-Talent eliminates data duplication.

COLLABORATIVE

Add as many users as you want and define each of their role. This way, users can only see the information they are allowed.

Recruiter or manager? Work together through the same system while keeping confidential data.

CUSTOMIZABLE

A feature does not suit your process? Tell us about it and we will fit perfectly your recruiting habits !

Developed in our offices by our programmers, TS-Talent can be modified according to your business process, either by yourself or by our development team.

SAFE

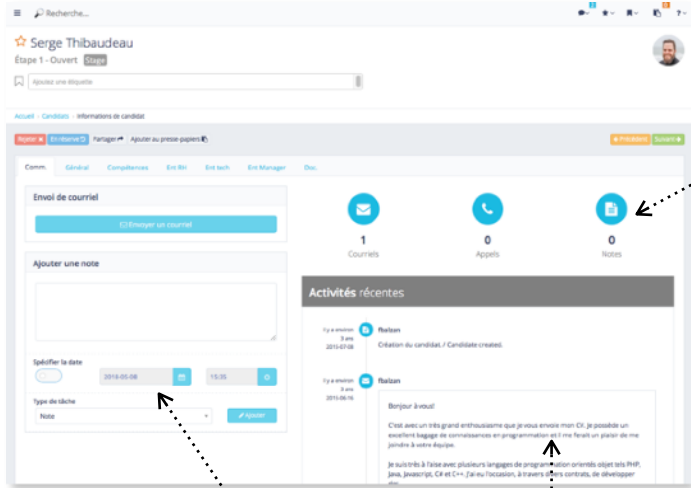

Security and confidentiality is at the heart of the TS-Talent.

Techso is aware of this reality and reduces risk through data encryption, two-factor authentication, and a lot more.

Powerful Applicant Tracking System

> Ask for a demo today !

And get a **30-Day Free Trial** with your own private Database

> **Customize** the candidate
